Class first SMSF Administration Software Provider to Get Data Feed from ING Cash Account

Thursday, 1 June 2017 – Leading cloud SMSF administration software provider Class now offers its users a direct-connect data feed from ING’s popular cash account, the first to do so.

Accountants and advisers using Class can now turn on the adviser-level data feed from within Class and receive daily transaction data from their clients’ ING accounts.

Class CEO Kevin Bungard said the ING feed was already one of the most popular in Class, after the major banks and Macquarie.

“It’s great to be the first to add this popular product from ING to our growing stable of data feeds,” Mr Bungard said.

“Quality, electronic data feeds coming direct from the institution are vital to getting the greatest efficiencies from cloud-based SMSF software.”

Class provides over 180 direct-connect data feeds for banks, brokers and wraps. Class feeds are audited - the ASAE 3402 certificate provided to SMSF auditors greatly streamlines end of year processing for accountants.
